PROFILE SUMMARY

I am currently working at Tata Consultancy Services with close to 5 years of experience. I started my career as an Application Support Analyst where I worked extensively on incident management, service requests, SQL-based troubleshooting, SLA handling, and coordination with multiple teams using tools like JIRA, BMC Helix, and ServiceNow.

During this time, I developed strong interest in data processing and analytics, which motivated me to transition into Data Engineering. For the last 2 years, I have been working on Databricks-based ETL solutions using SQL and Python, focusing on data transformation, data quality improvement, and pipeline optimization.

I also completed the Databricks Data Engineer Associate certification and Azure AZ-900 certification to strengthen my cloud and data engineering knowledge.

Currently, I am looking for opportunities where I can contribute more deeply in Data Engineering and work on scalable cloud-based data platforms.

EDUCATION

Maulana Abul Kalam Azad University of Technology
Masters of Computer Application; CGPA: 9.43

West Bengal, India
June 2019 - June 2021

SKILLS SUMMARY

- Cloud Platforms:** Azure Data Factory, Azure Data Lake Gen 2, Azure Blob Storage
- Data Architecture:** Medallion Architecture (Bronze, Silver, Gold), SCD Type 1 and Type 2, Schema Enforcement
- Programming and Scripting:** Python, PySpark, SQL
- Data Engineering:** Lakehouse Architecture, Data Warehousing.
- Tools and Versioning:** Git, JIRA

WORK EXPERIENCE

Data Engineer | Tata Consultancy Services, Kolkata

Dec 24- Present

- Developed and maintained ETL pipelines on Databricks using SQL and PySpark for processing business-critical datasets.
- Performed data transformation, cleansing, and validation to improve data accuracy and consistency across reporting systems.
- Designed complex PySpark/SQL transformation on Azure Databricks, implementing Spark tuning (Z-Ordering, Broadcast joins, and AQE) for SCD Type 2 logic that reduced processing time from ~2 hours to <30 minutes.
- Worked with cross-functional teams to gather requirements and deliver scalable data solutions aligned with business needs.
- Troubleshooted pipeline failures and resolved data-related issues to ensure reliable data delivery.
- Used GitHub for version control and collaborated within Agile sprint cycles using JIRA.

Application Support Analyst | Tata Consultancy Services, Kolkata

August 21 - Dec 24

- Resolved 95% of support tickets within SLA, enhancing team efficiency.
- Delivered 99% uptime for critical applications, boosting user satisfaction.
- Collaborated with cross-functional teams to implement system upgrades.
- Developed documentation that reduced onboarding time by 40%.

CERTIFICATES

Databricks Certified Data Engineer Associate

Microsoft Azure Fundamentals AZ-900

IIT Kharagpur AI4ICPS certified Hands-on approach to AI for real world application
